1. Print both copies and laminate. Best to laminate with both sheets back to back, so you can just flip over when you run out of categories on the first sheet.

2. Roll a dice. Whichever number is rolled, you go down on the list. If you roll a 5, you go down 5 spaces to number 5. The student must name an item from the category that they landed on. When it’s their turn again, they start from the previous number. So, if they were on 5 and rolled 3, they would move 3 spots to number 8.

3. Students get a point for naming an item from that category. You can award 2 points for naming an item that has their TARGET speech sound or if they can name 3 items in less than 10 seconds.

4. The student with the most points wins!
